fontanot®

“When I “entered” the unexplored staircase world, I had no models to refer to. Artisans were only asked to produce an “object”, a functional solution that allowed to go from one floor to another. My goal became transforming a “product” into a “service”. The stair had to be industrialized. I always tried, and still try, to go further forward, looking to the future.”

Enzo Fontanot

“I began manufacturing indoor staircases in the 70’s.”

In 1947 the Albini brothers founded an artisanal company in Rimini (in Borgo San Giovanni) to manufacture ladders for workers and of various types.

The workshop, located in the center of the city, employed six people and served an essentially local clientele.

As the first “staircase industry”, Fontanot had no previous reference. Enzo Fontanot sets out from the principle that the staircase is a “world” made of treads, structure and railing and works on this system using elements that are more and more modular, reducing the pieces and multiplying their functions.

Fontanot’s stair range currently represents the most qualified and complete expression of spiral and winder stairs on the market.

1947_
a great beginning

First_ in the world

the 70's_

The 70's are the turning point for Fontanot: Enzo Fontanot enters the firm and gives life to Albin & Fontanot.

the 80's_

The 80's are the years of the product's standardization thanks to the creation of a modular system that aggregates several standard elements assembled in different ways depending on the single need.

the 90's_

As of the 90's the idea to create a stair kit is born, something simple and quick to assemble, perfectly designed, well-fitted, with an excellent price/quality ratio.

the 2000's_

In the first years of the new millennium, the "Scenik" collection is born, a range of railings that can adapt to any interior decoration style. Since it was born, the company has been markedly oriented toward export and today it is present internationally with a net of qualified branches and distributors that can satisfy local needs of international markets.
